25X1A

Special Briefing

Value of Near Real-time Imagery in Crisis Situations

25X1A

1. [redacted] repeated for the benefit of COMIREX members the briefing he had presented to the Land Panel on 24 April (See paragraph 1, Section IV, this Minute). In introducing the briefing, [redacted] said that the main purpose of the briefing was to identify photography that had been available to us at crisis situation times in the past and its value to us. He said it was quite evident that each crisis has its own background and scenario; each has its own indices and observables; but in every case confidence in the information available, or credibility, is next in importance to timeliness.

2. A set of the briefing aids employed by [redacted] in his briefing are attached at Tab C.

25X1

Section I (Approval of Minutes, Briefings, and Reports on Operations)

Approval of Minutes

[redacted]

25X1

1. COMIREX-M-66 was approved. It was noted that the Air Force representative for both COMIREX-M-66 and COMIREX-M-67 should have been listed as [redacted] rather than [redacted]

25X1A

2. COMIREX-M-67 was approved with the addition of the following paragraph submitted by the DIA member. The new paragraph is to be inserted on page 8 following paragraph 8. The old paragraph 9 should be renumbered paragraph 10.

25X1A

"9. [redacted] indicated that he had requested the NRO presentation for COMIREX because of difficulties encountered in ICRS during preparation of Mission Priorities Statements. He indicated that it was important for COMIREX, as well as ICRS, to fully understand and appreciate the implications of our guidance to the operators. He indicated that the recommendations of the NRO presentation appeared reasonable and should serve as guidelines for J-Mission Priorities development. He also suggested that COMIREX concur in the near term operational ground rules for KH-4B tasking."

A typographical error in the last line of paragraph 7 on page 18 should be corrected: change "pans" to "pairs".

3. COMIREX-M-68 was approved.

4. COMIREX-M-69 was approved with the following correction made by the Department of State member:

Page 16, paragraph 14, line 9 -- change "political situation" to "political/military situation".

6. In answer to questions, [redacted] confirmed that as of now Mission 1051 is set to go on schedule tonight and will have a 20-minute window for launch. It was noted that this is to be the first evening launch in some time.

25X1A

Report on Aircraft Activities--Far East

25X1A

7. After confirming that no IDEALIST/TACKLE or FOOD FAIR missions were flown during the period 18 April - 1 May, [redacted] reported that, of a total of 23 BUMPY ACTION missions, 16 were successful; six low and one high were lost. He commented that one drone apparently crash landed in Thailand but the film was successfully recovered and processed. Details of the BUMPY ACTION missions are given below:

| <u>DATE</u> | <u>MISSION NO.</u> | <u>AREAS/TARGETS</u> | <u>RESULTS</u> |
|-------------|---------------------|--|----------------|
| 18 Apr | Q539/Q039(Low) | Hanoi POW-Coloc, SAM 166, Gia Lam Afld | Lost |

8. [redacted] reported GIANT SCALE missions during the same period as follows:

| <u>DATE</u> | <u>MISSION NO.</u> | <u>AREAS/TARGETS</u> | <u>RESULTS</u> |
|-------------|--------------------|---|----------------|
| 23 Apr | GS137 | Hoa Lac Afld, Xom Aplo Ammo Stor and PW Camp, Viet Tri RR Yd, Rte 1A, WW 19A, RR 4, Cst Seg 11 and 12 | Fair |
| 1 May | GS138 | Viet Tri RR Yd, Xom Aplo Ammo Stor, Hoa Lac Afld, Rte 1A, Seg V thru Z, RR 4, Seg C and D | Unknown |

25X1A

9. [redacted] reported attempts to satisfy two principal South China/North Vietnam requirements as follows:

a. No surveillance Coverage of Lines of Communications (LOC) pertinent to the introduction of Chinese forces into North Vietnam (see COMOR-D-25/207, 4 March 1966) was reported for the period 24-30 April 1969. The number of LOC priority targets in South China and North Vietnam remains at 352.

b. Coverage of North Vietnam to detect the possible introduction or deployment of offensive missile systems (see COMOR-D-25/200, 23 May 1967 and COMIREX-D-25.3/2, 20 November 1967) is shown on the grid map at Tab B for the period 17-23 April 1969. Four BUMPY ACTION missions flown during this time period and reported as successful have not been included. No SSM activity was observed.

Section IV (Action Items)

Briefing of Land Panel on Crisis Situations (Reference Special Briefing, page 5 of this Minute)

25X1
25X1A

1. The Chairman reported that the Land Panel had requested a COMIREX briefing on the problem of coverage of crisis situations. The briefing, which was presented by [redacted] was very well received. [redacted] impression from discussions which followed [redacted] briefing was that Dr. Land and the panel were even more insistent than in previous sessions that a near real-time readout system is an essential thing that must be pushed, and, for that reason, if no other, COMIREX should move along on taking a new look at requirements for near real-time readout so that they can be wrapped up within the next few months.

25X1A

25X1A
25X1A

2. [redacted] said that two important points came out of [redacted] briefing that had a direct impact on the Panel's considerations:
(1) It seemed clear that we needed a system that was on orbit and not on call. The problem of anticipating when you would need the system is so difficult that you almost have to have it all of the time, and
(2) A system that will do the early warning/indications job will do this job also.

25X1A

3. [redacted] noted that to complete the picture of the uses of near real-time readout, COMIREX should do an analysis of its value in routine intelligence production.

25X1A

Information Required for DBWG to Prepare Quarterly Resource Report

25X1

25X1A

4. [redacted] reported to the Chairman that he still had not received all of the information required to produce the quarterly resource report. Information is lacking from DIA, NPIC, Army, and on the OPICs. The Chairman again (Reference COMIREX-M-69, page 16, paragraph 15) requested that members representing the delinquent agencies get this information in to [redacted] as soon as possible.

25X1A

Lack of Progress in Preparation of Basic Support Exploitation Requirements for FY 1970

25X1

25X1A

5. [redacted] reported that EXSUBCOM is behind schedule in the preparation of basic support exploitation requirements for FY 1970. Whereas it was originally intended that the proposed program would have been reviewed and approved by COMIREX by 1 May, EXSUBCOM has not even received information as to what the needs for in-depth exploitation will be during the next fiscal year.

25X1A

[redacted] urged COMIREX members to do everything possible within their agencies to get the needed information to EXSUBCOM. The Chairman asked members to have their organizations get a first draft to [redacted] before 8 May.

25X1A

Approval of Priorities for Mission 1051

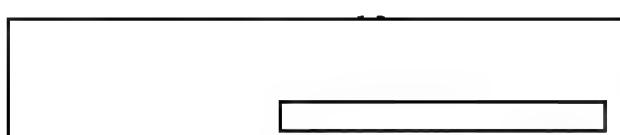

25X1

6. The Chairman, ICRS, reported that the coordinated priorities for Mission 1051 included 14 "Extraordinary" targets. He commented, too, that it had been possible to keep the number of target points at approximately 100 as had been recommended by OSP in its recent briefing to COMIREX (Reference COMIREX-M-67, page 7).

7. COMIREX approved the priorities for Mission 1051 as presented by the Chairman, ICRS.

COMIREX-M-70
1 May 1969

25X1A

Section V (Status of Recent COMIREX Papers)

25X1A

Flexibility--Quick Response Capability for CORONA (COMIREX-D-13.6/1)

25X1A

25X1A

1. [redacted] Referred to the discussion on flexibility at the COMIREX meeting on 17 April (Reference COMIREX-M-69, page 13) and noted that General Berg had forwarded a detailed response to the questions raised at that time. General Berg's memorandum was distributed to COMIREX members as an attachment to COMIREX-D-13.6/1. The Chairman said that he felt General Berg's memorandum highlights the situation we are in--we do not have any flexibility.

25X1A

2. During discussion of the lack of flexibility in the CORONA launch schedule it was pointed out that if there is an accident which destroys the pad, it would cost in the neighborhood of [redacted] to bring the standby pad to full operational status. A switch to a second pad could be accomplished in 60 days.

NRO

25X1

3.

[redacted] suggested that a COMIREX clarification of requirements outlining differences between "crisis response" and "standby" might be helpful in order for all to better understand the specific urgency to be attached in each situation.

25X1A

4. The Chairman commented that we have worked hard to squeeze down on money spent and now have a schedule that meets our predictable requirements so long as nothing goes wrong. However, if we feel that flexibility is important, the only possible way to get it is by spending money.

25X1A

5. [redacted] reported that the Executive Secretary, USIB, had called this morning and that [redacted] felt a report on the question of flexibility should be prepared to go to USIB. The Chairman said that he will have a draft paper prepared and circulated for discussion at a COMIREX meeting later this month.

25X1

25X1A

25X1A

6. The Acting CIA member felt that the draft memorandum to USIB which had been prepared by the MCGWG left some questions unanswered and indicated that his Agency could not concur in it as presently written. [redacted] pointed out, however, that he sees no objection to releasing all available domestic KH-4 material as well as available KH-5, [redacted] over the United States that would be useful to the USGS.

NRO
25X1

8. The NRO consultant pointed out that his office should receive graphic displays of requirements for domestic coverage at least six weeks ahead of time to give them time to plan the [redacted] units and the engineering targets.

25X1A

25X1A

9. The Security consultant reported that he had received a priority request from [redacted] of the USGS for the release of available KH-4 photography of Alaska for use in mapping the northern quadrant of Alaska. COMIREX agreed that it had the authority to act for USIB in this matter and authorized [redacted] to release KH-4 photography of Alaska held by TOPOCOM to USGS.

Duplication in Maintenance of Area Coverage File

25X1

1. The DIA member reported that, in response to a COMIREX request (COMIREX-M-56 page 22), a mosaic index of KH-4 coverage prepared by DIA has been coordinated at the working level with Army, Navy, Air Force, CIA, and the MC&G community. It looks as though NPIC will be able to discontinue the production of the mosaic it has been producing. [redacted] paper has been circulated as an attachment to COMIREX-D-32.6/3 and will be scheduled as an agenda item for the COMIREX meeting of 22 May].

CRISIS

★ CRISIS is defined as that crucial time, stage, or event during which U.S. national interests are in actual or potential jeopardy. It requires prompt and intensive consideration at the highest national level together with a concurrent review of pertinent U.S. policies and options. Under such conditions, crisis periods are characterized by an uncompromising demand for a more authoritative, continuous and timely flow of intelligence.

- ARE THERE SIGNIFICANT AND UNIQUE OBSERVABLES RELEVANT TO AN UNDERSTANDING AND ASSESSMENT OF SPECIFIC CRISIS SITUATIONS ?
- WHAT HAS BEEN THE RESPONSIVENESS AND ADEQUACY OF RECONNAISSANCE SYSTEMS IN PROVIDING INFORMATION ON SUCH OBSERVABLES IN TERMS OF TIMING, SWATH AND RESOLUTION ?
- WOULD NEAR REAL TIME AWARENESS OF CRISIS-RELATED OBSERVABLES PROVIDE A SUBSTANTIALLY IMPROVED BASIS FOR INTELLIGENCE JUDGMENTS AND NATIONAL POLICY PLANNING ?

CRISIS SITUATIONS

- CZECHOSLOVAKIAN INTERVENTION (AUG 1968)
- MIDDLE EAST WAR (JUN 1967)
- NORTH KOREAN PROVOCATIONS (JAN 1968 AND APR 1969)
- CUBAN CRISIS (OCT 1962)
